

**Solutions that Evolve**

## **Integrating and Maintaining the Latest Technologies**

With over 30 years of industry experience, J2 Associates can streamline your operations with the best technical support available to drive your organization's mission.

We provide comprehensive program and project management services that drive our clients' business goals and support their objectives. We pride ourselves on providing excellent customer service to our clients as well as on-demand IT support. At J2 Associates, we value a safe, secure, and efficient professional environment, which is why you can trust our dedicated IT professionals and our innovative solutions with confidence.

Our highly seasoned professionals are able to provide information collaboration and sharing solutions utilizing our depth of knowledge in agile based standards and open source solutions. We have carefully developed reliable threat identification and resolution services to protect your valuable information in an increasingly data-sensitive world.

## IT Professional Services

When it comes to IT professional services, J2 Associates leads the IT contracting industry with comprehensive and innovative solutions in design, engineering, implementation, training, and other technical services to help your organization meet the growing demands of today's complex environment. After a careful assessment of your needs, the IT professionals at J2 Associates can develop a technology strategy that identifies areas of opportunity and supports the pursuit of your objectives both today and tomorrow.

The professional IT consultants at J2 Associates are available to provide everything from problem solving and troubleshooting for individual projects to turnkey strategies that impact your overall organization effectiveness.

Our core IT solutions address your concerns in:

- Network & System Administration
- Cloud Security
- Network Security Monitoring

## Systems Integration

In today's ever-changing world of Information Technology, it's important to stay one step ahead of your competition. The professional systems integration services offered by J2 Associates are utilized to enhance your own IT capability and make your operations more adaptable to change and innovation. Our technical solutions will streamline your existing systems and lay the groundwork for future changes and enhanced, secure data sharing and collaboration.

Our systems integration specialists at J2 Associates have the knowledge and experience necessary to seamlessly integrate new technology with your existing systems. As a trusted systems integration specialist, we can prevent operational delay as well as loss in time and resources.

Our system integration solutions can address your concerns in:

- Enterprise Operations
- CCTV Systems
- Video Teleconference & Audiovisual Systems
- Data Communication

## Cyber Security Services

In today's data-sensitive world, it's important that your business and client information is completely secure and protected from unauthorized access. If your system security has exploitable flaws, a breach could greatly harm your integrity and credibility, not to mention submitting your organization to heavy fines depending on the leaked information or government branch you work within. The professional cyber security personnel at J2 Associates are trained to resolve and prevent security blind spots without impeding the accessibility of authorized personnel who rely on navigating the systems for daily use.

When you partner with J2 Associates for your cyber security needs, we'll analyze your networks and information systems to identify vulnerabilities and recommend areas of opportunity to upgrade or strengthen your existing security systems.

Our cyber security solutions address your concerns in:

- NIST Risk Management Framework
- NIST 800-53 Security Controls
- Security Impact Analysis
- Network Monitoring
- Security Consulting
- Security Planning
